TESOL INTERNATIONAL CONFERENCE 2025

Tuesday 5 August 2025 - Tuesday 5 August 2025

HUFLIT University

Scientific Programme

AI and TESOL: Innovations in English Language Teaching

This track explores AI-powered tools and their application in language teaching, such as chatbots, virtual assistants, automated tutors, and personalized learning technologies. Contributions may include case studies, tools, and empirical research.

The AI Revolution in TESOL: Teaching, Learning, and Innovation

Focused on how AI is transforming teaching methodologies, curriculum design, and teacher training. Ethical considerations in AI integration are also welcome. Papers may examine theoretical or applied innovations.

Harnessing AI in TESOL: Opportunities and Challenges

This track investigates how AI reshapes assessment, feedback, and learner support. Topics may include bias in AI tools, accessibility for non-native English teachers, and learner evaluation.

Teaching English in the Age of AI: Perspectives and Practices

Dedicated to practical classroom applications, this track invites papers and workshops on AI-enhanced lesson planning, content creation, and inclusive practices. Contributions may be pedagogical, reflective, or applied research.
